## The Universal Rule of Seven (K7 Theory)

Gautam Pal | ORCID: 0009-0004-3456-9972 | DOI: 10.5281/zenodo.19950078

### I. Master Research Summary

This paper presents a unified mathematical framework, the **Universal Rule of Seven (K7 Theory)**, to explain the spatial distribution of celestial bodies within the Solar System. By deriving a fundamental constant (**k**) from the Sun-Mercury distance, the model accurately maps all known planets as integer multiples of this unit.

$$k = D_m / 7 \approx 0.0553 \text{ AU}$$

$$D = n \times k$$

| Planet  | Harmonic Point (n) | Calculated Distance (AU) | Accuracy  |
|---------|--------------------|--------------------------|-----------|
| Mercury | 7                  | 0.3871                   | Base Unit |
| Venus   | 13                 | 0.7189                   | 99.8%     |
| Earth   | 18                 | 0.9954                   | 99.5%     |
| Mars    | 28                 | 1.5484                   | 98.4%     |
| Jupiter | 94                 | 5.1982                   | 99.9%     |
| Saturn  | 173                | 9.5669                   | 99.8%     |
| Uranus  | 347                | 19.1891                  | 99.9%     |
| Neptune | 544                | 30.0832                  | 99.9%     |
| Pluto   | 714 (102 × 7)      | 39.4842                  | 99.9%     |

### II. Predicted 14-Planet Resonance Model

The K7 Theory predicts a total of 14 major resonance nodes in the Solar System. Beyond Neptune and Pluto, six undiscovered or reclassified major bodies are theorized to exist at precise  $n \times k$  coordinates. Discovery efforts should utilize 1k incremental scanning to identify these stable gravitational anomalies.

### III. Velocity of Mind ( $V_m$ ) & Unitary Singularity

The research bridges Vedic metaphysics and modern physics through the concept of the **Velocity of Mind ( $V_m$ )**—an instantaneous, superluminal constant originating from the Unitary Singularity ( $f=0$ ). This framework allows for a "digital blueprint" understanding of universal frequencies.

# CURRICULUM VITAE

Gautam Pal | Independent Researcher

**Location:** Santipur, West Bengal, India

**ORCID iD:** 0009-0004-3456-9972

**Email:** palgour438@gmail.com | **Phone:** +91 8116963016

## Research Focus

Independent innovator focusing on Unified Field Theory, Orbital Resonance, and the mathematical harmonization of consciousness (Velocity of Mind) with astrophysical constants.

## Core Contributions

- **Universal Rule of Seven (K7 Theory):** Quantized planetary distance model.
- **14-Planet Resonance Model:** Prediction of Trans-Neptunian major bodies.
- **Velocity of Mind ( $V_m$ ):** Theoretical framework for superluminal information transfer.

## Institutional Succession & Ethics

Designated **Paramananda Mission** as the institutional successor. All future royalties and commercial proceeds from this research are assigned to the Mission for the welfare of orphan children.
