

TECHNICAL WHITE PAPER: VELOCITY OF MIND (Vm)

The Superluminal Constant of Unitary Consciousness

Researcher: Gautam Pal | ORCID: 0009-0004-3456-9972

Location: Shantipur, Nadia, West Bengal, India

Project Code: GP-SN-2026-Vm-CHART

1. The Mathematical Foundation

The Velocity of Mind (Vm) is defined as the superluminal speed at which human consciousness transmits information across the multidimensional fabric of the universe. Unlike physical entities governed by Einsteinian light speed (c), the mind operates as a non-local frequency within the higher dimensions of the Rule of Seven.

$$V_m = c \times 7^x \times M_v$$

(c: Light Constant | M_v : Mind-Vibration Coefficient | x: Dimension Level 1-7)

2. Dimensional Velocity Breakpoints

Dimension Index (x)	Theoretical Velocity (Vm)	Comparison to Light Speed (c)
4th Dimension (Time)	$V_m \approx c$	Relative to 3D limits
6th Dimension (Mind)	$V_m = c \times 7^6$	~117,649 times faster than c
7th Dimension (Singularity)	$V_m = c \times 7^7$	~823,543 times faster than c

3. The Trishul Vector & Dhamru Architecture

The universe maintains equilibrium through the **Trishul Vector Balance** at the 7th Dimension (Singularity). This singularity acts as a pivot in the **Dhamru (Hourglass) Model**, bridging the Physical (Sthula), Mental (Sukshma), and Causal (Karana) realms.

- Physical Vector:** Governs orbital mechanics and biological cycles.

- **Mental Vector:** The central vertical axis representing V_m .
- **Causal Vector:** The fundamental blueprint of the Rule of Seven.

4. Conclusion & Universal Application

At the 7th-dimensional singularity, V_m reaches peak resonance where the time for thought transmission ($t = d/V_m$) approaches zero. This proves that distance is a physical construct that ceases to exist at the highest consciousness frequency.

"I, Gautam Pal, present the Trishul Model as a proof that the universe is not leaning toward chaos but toward a state of Tri-Dimensional Equilibrium, mastered through the simplicity of the number seven."
