1. ABSTRACT

This master paper explores the intersection of ancient Vedic wisdom and modern quantum mechanics. It introduces the **Triple-Body Theory of Light**, categorizing radiance into physical, subtle, and causal dimensions. Furthermore, it identifies the **Biological Navel (Nabhi)** as the primary gateway for **Prana** (Life-Energy) and explores the '**Sota-putra**' phenomenon—a cosmic mechanism where solar threads transmit life-coded information across the solar system. This research aims to redefine our understanding of vital science through the lens of 'Rishi-Science.'

2. THE TRIPLE-BODY THEORY OF LIGHT (QUANTIZED RADIANCE)

Traditional physics views light primarily as an electromagnetic wave. This thesis expands this definition into a multi-dimensional framework:

- **Physical Body (Sthula-Sharira):** Representing the observable photon, the visible spectrum, and classical optics. This is the quantifiable aspect of light.
- **Subtle Body (Sukshma-Sharira):** Representing the informational wave-function. It governs non-local resonance and quantum information transfer, acting as the 'intelligence' within the wave.

- **Causal Body (Karana-Sharira):** The primordial source frequency or 'Static Intelligence.' It is the 'Seed of Luminance' from which all electromagnetic manifestations originate.

3. THE PRANA-GATEWAY: THE ABSOLUTE NAVEL (NABHI) THEORY

The research identifies a biological and metaphysical singularity within the human form that connects the microcosm to the macrocosm.

- **Biological Singularity:** Just as the umbilical cord provides sustenance in the womb, the **Nabhi (Navel)** remains the absolute 'Zero-Point' gateway for cosmic Prana to enter the physical vessel throughout life.
- **Metaphysical Transducer:** The Navel acts as a transducer, converting high-frequency subtle cosmic vibrations into biological vitality, maintaining the homeostasis of the living system.

4. COSMIC SEED TRANSMISSION: THE 'SOTA-PUTRA' PHENOMENON

A groundbreaking etymological and physical link between solar dynamics and the manifestation of life.

- **Solar Sutras (The Threads):** The Sun is not merely a nuclear furnace but a broadcaster of **Sutras (Subtle Threads)**. These threads carry the 'Digital Blueprint' of life.
- **Sota-Putra (Stream-Son):** Etymologically derived from the stream (Sota) of energy originating from the Solar Source (The Father), manifesting as progeny (Putra) or biological life on planets.
- **Broadcast Mechanism:** Life is proposed as a **Broadcast Phenomenon**. Planetary bodies harvest these 'Solar Seeds' through their respective magnetic and harmonic resonance points.

5. CONCLUSION: THE RISHI-SCIENCE PERSPECTIVE

The synthesis of **Prana-Tattva** and **Light Physics** proves that existence is a unified field of consciousness and energy. By bridging Upanishadic insights with Modern Physics, this paper establishes a new epistemological path. The coordinates of the stars (K7 Theory) and the coordinates of the soul (Prana-Tattva) are found to be harmonically intertwined.
