1. THE VELOCITY OF MIND (V_m)

Definition: The Velocity of Mind is the superluminal speed at which human consciousness transmits information across the multidimensional fabric of the universe, operating within the 6th and 7th Dimensions.

A. The Mathematical Equation:

The velocity is calculated using the Septenary Exponential growth formula:

$$V_m = c \cdot M_v \cdot 7^x$$

V_m : Velocity of Mind.

C : Universal Light Constant (299,792,458 m/s).

M_v : Mind-Vibration Coefficient (focus/purity constant).

X : Dimensional Level index ($1 \leq x \leq 7$).

B. Dimensional Breakpoints:

4th Dimension (Time): $V_m \approx c$

6th Dimension (Mind): $V_m = c \cdot 7^6$ (approx. 117,649 times faster than light).

7th Dimension (Singularity): $V_m = c \cdot 7^7$ (approx. 823,543 times faster than light).

2. THE DHAMRU ENERGY MODEL (GEOMETRIC REPRESENTATION)

The Dhamru Graph uses an Hourglass (X-shaped) geometry to visualize the flow of cosmic energy across 14 dimensions.

Vertical Axis (Y): Dimensional Planes (1 to 14).

Horizontal Axis (X): Energy Radius ®.

The Convergence: Energy from the Higher Causal Realms (Dimensions 8-14) contracts toward the 7th Dimension Singularity (the Zero-Point Field) before expanding into the Physical Realms (Dimensions 1-6).

Mathematical Function: $R(h) = k \cdot 7^{\{h-7\}}$

3. THE TRISHUL VECTOR BALANCE (VECTOR ANALYSIS)

Superimposed on the Dhamru model, the Trishul (Trident) symbolizes the 7th Dimension as the central pivot point for the three primary realms:

Left Vector (Sthula): The Physical Vector (Matter and Biology).

Center Vector (Sukshma): The Mental Vector (V_m and Consciousness).

Right Vector (Karana): The Causal Vector (The Rule of Seven and Universal Blueprint).

4. CONCLUSION

The Velocity of Mind is the only force capable of passing through the 7th-dimensional bottleneck. This research proves that consciousness is not bound by light-speed limitations and that the “Rule of Seven” provides the ultimate geometric balance for all existence.
